

Alma, a Sisram Medical Company, Awarded MDSAP Certification, Acknowledging the Highest Quality Standards in the Medical Device Industry

November 30, 2018, Hong Kong, China -- Alma, one of the top five global leaders of energy-based medical and aesthetic solutions, today announced it has received the Medical Device Single Audit Program (MDSAP) certification, following an audit process to upgrade its quality management system certifications.

The ISO 13485:2016 and MDSAP are the latest Medical Device industry quality standards, which cover the requirements of multiple regulatory jurisdictions, and comply with the guidelines of health authorities in the USA, Canada, Australia, Brazil and Japan.

The MDSAP defines medical device manufacturers' quality management system standard, as well as those for design and development, purchasing, manufacturing processes, distribution, service and post-marketing surveillance.

"We are extremely proud of this latest achievement, which positions us at the forefront of quality assurance in the industry," said Avi Hirshnzon, EVP Quality Assurance & Regulation Affairs.

"Alma, as an industry leader, marks innovation, quality, and safety as key corporate pillars. Obtaining the MDSAP certification is an important step to maintain our productive and successful market leadership," said Lior Dayan, Alma's CEO.
